

INSUduct™

The Future Today

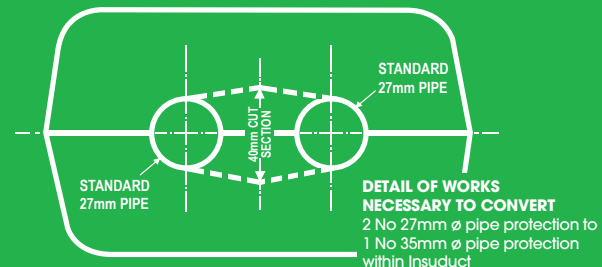

THE GREEN AND COST EFFECTIVE SOLUTION TO WATER PIPE PROTECTION

INSUduct™ is a purpose designed product that eliminates the risk of freezing to incoming above ground water supplies. Thermally insulated, quick and easy to install and made from 100% recycled materials* **INSUduct™** delivers an environmentally friendly and cost effective solution to water pipe protection.

Why use INSUduct™?

- Saves time and money – two hours installation time instead of up to two days!
- “Climbing” facility
- Single, twin or larger water service pipe capacity in one unit
- No trauma, no hassle
- Interfaces with Groundbreaker System
- Insulation thermally efficient
- Impermeable to eliminate infiltration of ground water
- Exceeds Water Regulations Guidelines
- Takes either 2 No. 27.4mm (OD) pipes (barrier pipe) or 1 No. 35mm (OD) pipe (by removing centre section)

Used with or without Groundbreaker for:

- New homes
- Urban regeneration
- Decent homes programme
- Park homes & caravan sites
- Water service repairs
- Lead pipe replacements
- Rainwater harvesting and grey water schemes
