Option 1: Obstruction at 750 mm and over

Solution: SHalلودuct can be used to take the water supply over* the obstruction - natural or man-made. e.g. concrete foundation, pipe, rock.

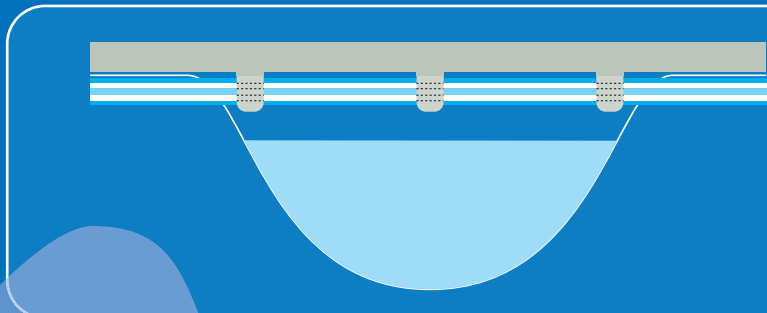

*in accordance with water regulations

Option 2: Supply needed into new builds

Solution: SHalلودuct can be used to take the water supply into* the property

*SHalلودuct is designed for use on its own or with INSUduct and Groundbreaker. Groundbreaker is a purpose designed unit that is designed for bringing water services to a new or existing building.

Option 3: Water obstruction

Solution: SHalلودuct can be used to take supply over* the obstruction. (e.g. attached to bridge, jetty etc.)

*SHalلودuct's insulation in combination with corrugated pipe systems can provide a safe, above surface option for supplying water.
